

# DIEM<sup>®</sup> 2: Solutions For Immediate Full Arch Rehabilitation *In One Day*

Tompkins County Dental Society

Presented by Biomet 3i

BIOMET **3i** has extended treatment options for immediate full arch rehabilitation with the DIEM 2 guidelines. DIEM 2 offers rehabilitation for both arches, utilizing innovative products to deliver provisional prostheses, in as little as one day. This course is designed to provide practical and innovative solutions for placing four or more implants in the full arch utilizing Low Profile Angled Abutments on the provisional prosthesis, the day of implant placement.

Participants will learn the DIEM 2 protocol essential for patient care. Additionally, they will learn how DIEM 2 may improve practice productivity and efficiency by reducing chairside visits for each case.

## Speakers:

Jennifer Cullen is a Digital Dentistry Sales Specialist with Biomet 3i. She is a graduate of Bridgewater State University and has been working in the dental industry for the past 10 years. Over that time she has focused specifically on the support of clinicians in the use of a variety of dental technologies. Jen has been involved in over 200 live patient and hands-on continuing education courses all over the United States. These programs focus on full mouth rehabilitation, occlusion, implementing digital technologies and practice growth.

Scott Johnson, CDT is a Fixed Team Manager at BonaDent<sup>®</sup> Dental Laboratories and has been with BonaDent for over 25 years. After graduating from Cortland University, he began his training in the dental field. Scott is a graduate of the LVI Anterior Esthetics program and has been trained in occlusion by the Dawson Center. He has been a Certified Dental Technician in Ceramics since 1996. Scott has received extensive training in the DIEM 2 full arch rehabilitation and denture conversion process and maintains a solid restorative knowledge from which to treatment plan complex cases and design beautiful smiles.
